

ELSTON MANUFACTURING INC.

Open Flame Cargo Heaters

Elston Manufacturing is a family owned business located on the great plains. We have been building cargo heaters for over half a century. Our open flame cargo heaters are rugged and dependable and used in many industries including horticulture. These heaters are one of the most cost effective solutions for providing occasional heat in a trailer or truck body.

18,000 BTU of thermostatically controlled heat - enough heat to prevent cargo from freezing in most insulated trailers

Portable - easily moved in and out of your trailer for heat when and where you need it without taking up cargo space when you don't

Efficient - All the heat goes directly into the trailer

Rugged - Built of 14ga and 18ga steel to hold up to the the vibration and inevitable bumps and scraps of regular use

Reliable Heater - A proven design refined over decades

X-900

It holds two 20 or 30 lbs bottles and is designed for long range, over the road service.

118T

Trades portability for reduced cost. Permanently mounts on the wall of the trailer or van body when you don't need to move the heater.

X-700

Ideal for local pickup and delivery and short hauls. Holds a single 20lb bottle.

Accessories

X-1025 Single Bottle Holder

Safely carry one 20 lb propane bottle (not included) when using the 118T. It includes the bottle carrier, regulator, hoses, and fittings.

X-1050 Dual Bottle Holder

Safely carry two 20 or 30lb propane bottles (not included) when using the 118T. It includes the bottle carrier, regulator, hoses, and fittings.

Adjustable Mount

Secure a X-700 or X-900 in a trailer without using mounting brackets. Fits any trailer or van between 77 and 109 inches tall inside.

C-980-A for X-700

C-990-B for X-900

X-850 Ventilator

Allows a continuous supply of oxygen and improves air circulation when cargo heaters are in use. Recommended for trailers that do not have an existing vent.
