

TRACTION SANDERS

Deliver grit to tires instantly. Keep buses rolling safely, and on schedule.

Parents put their trust in your bus every school day. To help you meet that responsibility, **ELSTON MANUFACTURING** pioneered the development of the Traction Sander.

ELSTON Traction Sanders lay down an even carpet of traction grabbing grit. This controlled traction reduces excessive wear on tires and transmissions caused by spinning wheels on icy-wet surfaces. Cuts fuel waste. You stop and start faster, and climb steep grades.

LOW INITIAL COST LOW MAINTENANCE TRACTION ON DEMAND
